The following functions have been added and changed in firmware version 2.0.

**Changing the looper position**

The looper can now be placed either before or after the effect. By changing the looper position to before the effect, the looped sound of a performance can be used to craft the sound without continuing to play.

1. **Activate the looper.**
   - Press
   - Return to previous mode: Press

2. **Change the looper position.**
   - Turn

<table>
<thead>
<tr>
<th>Setting</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre</td>
<td>The looper is positioned before the effects.</td>
</tr>
<tr>
<td>Post</td>
<td>The looper is positioned after the effects.</td>
</tr>
</tbody>
</table>

**NOTE**
Changing the recording time, loop or position or tempo will clear any loop that has been recorded.

**HINT**
The tempo (BPM) setting available up to firmware version 1.1 can be changed using the rhythm or from SETTING > SETUP.

**Setting value display during rhythm playback**

Rhythm settings can now also be checked during rhythm playback.

**Before Version 1.1**

- Stopped
- Playing

**After Version 2.0**

- Playing/stopped
