

## Q2n

# Information about recommended batteries and writing speed of the SD card

## About recommended batteries

To extend continuous shooting time, following batteries are recommended.

· Alkaline

Panasonic EVOLTA

SONY STAMINA

Maxell VOLTAGE

FUJITSU HighPower

DURACELL QUANTUM

Energizer eco advanced

Energizer MAX

· Nickel Metal Hydride(NiMH)

Panasonic eneloop

· Other suitable batteries for "digital cameras" and "charging smartphones" that can supply large current continuously.

If you use batteries other than the above, the power may be shut down in about 40 minutes

## About writing speed of the SD card

When you record to a micro SD card with slow writing speed, recording may be stopped and then the power will be shut down automatically.

Please be sure to use a recommended micro SD card with operation confirmed.
